## IIDEC

Think Automation and beyond....

## AGV AND AUTOMATED WAREHOUSE INDUSTRY

With trends such as the advance of e-commerce continuing to push toward automated warehouses and AGVs, material handling technologies that boost efficiency and automation in the flow of goods must provide the added value of uninterrupted operation and visual control. As seen with the formulation of IS03691-4 as the new AGV safety standard, balancing safety and peace of mind with productivity could also become an even greater issue in AGVs and automated warehouses. IDEC has a strong history of supplying the industry with safety, HMI, control panel, and automation solutions, as well as a wide range of standard-compliant products. We will continue to use the latest technology to offer solutions that contribute to the advancement of AGV and automated warehouse.

## AGV / Automated Warehouse Industry and IDEC

## BOOSTING PERFORMANCE

IDEC helps boost the performance of customers' AGVs and automated warehouses with a vast array of product lines, including switches for triggering the operation of equipment and facilities, operator interfaces for visual control, barcode scanners for product identification, push-in terminal blocks that reduce the installation space and wiring time required for the control devices and safety laser scanners, interlock switches, bumper switches, and enabling switches that ensure operator safety and peace of mind.

## PREVENTING DOWNTIME

Preventing downtime in AGVs and automated warehouses hinges on not just reliability but also ease of use. When it comes to quality, IDEC places the utmost priority on both reliability and ease of use and has been constantly making improvements, which is why our products are used by so many customers in so many areas of the AGV and automated warehouse industry. IDEC will continue to develop and supply products with a focus on reliability and ease of use, helping to attain AGVs and automated warehouses with no downtime.

## LOOKING AHEAD

As AGVs become increasingly multifunctional and automated warehouses even more efficient, environments where AGV and equipment operation area is physically separated from human work areas will give way to collaborative environments where people work collaboratively with machinery in the same space. The new AGV standard IS03691-4, formulated in February 2020, will also be revised in the years ahead, making safety standards even clearer. IDEC will pursue product development geared toward peace of mind in addition to safety for the collaborative work environments, while at the same time continuing to provide solutions that facilitate market changes and help realize the bright future of AGVs and automated warehouses.

## Safe and efficient solutions for the logistics indust y

Safety products that ensure the safety and security of workers

Tablet Mount Safety Device

Safety functions (emergency stop switch / enabling switch) added to commercially available tablets for use as a remote controller or teaching pendants

- The device can hold tablets 8 to 11 -inch for flexible mounting.
- Ergonomic grip design ideal for long and fatigue-free operation.

【 Pivoting mechanism allows the tablet to be used vertically or horizontally to display a variety of contents including drawings, tables, and graphs.

I Dedicated accessories including wall mount for installation in limited spaces when the device is not in use.

| Series | Operating Temperature | Operating Humidity | Degree of Protection | Supported Tablet Sizes | Supported Tablet Thickness | Switches |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

*1) USB power supply

## Ensuring safety when using a tablet as a remote controller for AGVs / automated warehouse

## BEFORE

Safety issues occur when tablets are used.

```
    AFTER
```

Easy and safe operation can be achieved
Satisfies IS0369-4
requirements

Emergency stop switches and enabling
switches can be operated while holding the
tablet with one hand.

Coming Soon

## $S E 4 D=C \quad$ Safety Light Curtains

Compact, lightweight, and high performance. Ideal for detecting access to restricted areas at robot systems

I Compact size fits on aluminum frame used as safety fences around restricted areas to avoid collision with detected objects.

I Although compact in size, various functions such as a muting function, fixed blanking, and floating blanking, are available for conveyor lines.

I Large operation indicators indicate the presence of the light curtain and prevent downtime due to inadvertent shading in automated warehouses.

[^0]
## 递 SE2L

Safety Laser Scanner

## Compact safety laser scanner for easy integration in AGVs

- Compact size suitable for integration in devices ( $85 \times 85 \times 95 \mathrm{~mm}$ ).
- Safety can be maintained throughout a range of 270 degrees at a distance of 5 m with a single unit. Ideal for equipment using robots such as palletizing robots and long conveyor lines.
- A combination of up to 4 master and slave units can be connected. This makes it possible to integrate input and output of multiple units for 360-degree detection of AGVs, as though they are a single unit.
- A maximum of 128 area patterns can be configured/switched according to the mobile application such as AGV, ensuring optimum protection in various applications.
- By sending out distance measurement data through the Ethernet port on an AGV, data of obstacles in surrounding areas can be acquired and used as AGV location information.

【SE9Z-* connection box equipped with a safety relay reduces maintenance time and wiring ${ }_{\left({ }^{*}\right)}$.
${ }^{* 1}$ Coming Soon

- Distance 5 m , sensing angle

*1) average stride length ( 70 cm ) for a 170 cm tall person

Safety ensured with maximum of $128\left({ }^{*}\right)$ area patterns

*2) Maximum 32 sets of area can be configured by parallel input when switching the area by encoder input.

Master slave connection achieves 4 times the sensing area of a single unit Up to 4 units can be connected using RS-485, increasing the sensing area up to 4 times.

Interlock Switches

#### Abstract

Compact interlock switches suitable for safety doors in automated warehouses

I Compact size mounts comfortably on an aluminum frame without impeding. 2-contact models suitable for category 2 are also available (1)

- Locking/unlocking is achieved using a key. By using the same key as HW switches, hostage control is possible (*2)

Head removal detection function prevents accidents that are caused by a door opening unexpectedly when the head is removed (**) ( ${ }^{(3)}$

I Complete with 2 types: a Spring lock type and a Solenoid lock type for applications where locking is not required for safety (1).

I Rear unlock button models available for unlocking doors in case a person is left behind in a dangerous area.

## 递 HG1P

Operator Interface Hand-Held Model

#### Abstract

Lightweight, robust, user-friendly teaching pendant for AGVs and various equipment in automated warehouses

ILightweight and compact, weighs only 500 g , yet robust and drop resistant to a height of 1.5 m , to prevent damage if it is dropped.

I Ergonomic design ideal for long, fatigue-free operation. 1.5 second start up reduces wait time.

I High-resolution 4.3-inch TFT color LCD display. Clear and informative display enables intuitive operation.

- Removable cable enables cables to be detached easily when damaged. Saves downtime and cost.
I Easy maintenance with a USB memory card achieve a simple and easy work environment.

## Circuit protector for usability and safety

- The flat handle fits in the main body to prevent misoperation due to contact.
- Safe trip-free mechanism ensures that the circuit is cut off even if the handle is operated immediately after an accident, in order to avoid a sudden restart.
| Integrated terminal covers achieve IP20 fi ger protection and prevent electric shock.
- AC / DC common models help reduce stock.
- Finger-safe, spring-up terminal reduces wiring time Ring terminal tabs can be installed easily, and screws are held captive

- Padlock Attachment

Locks the retractable actuator in the off position to prevent NC1V from being switched on inadvertently.

【 Main circuit terminals are fingersafe (IP20) Spring-up, fingersafe structure requires no terminal cover.

-Auxiliary/Alarm contact terminals are equipped with a terminal cover
Voltage coil terminals on the relay trip version are also equipped with
a terminal cover as standard.

Application: Indicators and alarms for AGVs, AMRs, and automated warehouses

## 递 LH1D/AP22/Q

## Series

Indicators

Indicator lights suitable as AGV direction indicators, achieving both improved visibility from various angles and space savings

I Indicator lights can be installed on the surfaces of AGVs, shuttles, palletizing robots (mounts directly on equipment). (LH1D)

- Available in a wide selection of variations, such as flat, dome, Ø66 dome, 2-color switching, and 3-color switching. (LH1D)
IUnique optical design ensures high visibility even in bright environments such as in warehouses. (AP22)

IS Safety is ensured by preventing electric shock with fi ger protection on terminals.

IUltra-bright LED pilot lights achieve excellent visibility under strong daylight. (Q)
\|A wide range of sizes available, from $\varnothing 6 \mathrm{~mm}$ to $\varnothing 22 \mathrm{~mm}$. ( Q )

Application: Indicators and alarms in AGVs, AMRs, and automated warehouses

## 

Pushbuttons

Wide variety of switches with stylish design and functions such as flush silhouette

I Stylish design with bezel heights of 2 to 2.2 mm . (LB, LBW, (except AV22PNA))

I Removal contacts, single board mounting (LB, LBW)
I Robust and metal switches with stylish design (AV, ES), IP69K (ES) suitable for use in warehouses of food companies, and near conveyors requiring washdowns.

I Removable Contact Block /Single Board Mounting Removable contacts enable easy wiring / Single board mounting for space-saving installation.

UP series has the same depth as LB/LBW series. Mounts on the same panel. (Flush bezel: 34.9 mm , standard bezel: 27.9 mm )

Application: Operation switches for AGVs and AMRs

## 遊

 TS/NV seires $^{\text {OAPEM }}$Miniature Joysticks

Thumb-operated controllers with contactless hall effect technology. Ideal for installation on remote controls to enhance operability.

- By using non-contact hall elements, equipment maintenance work is reduced, achieving longer life and downsizing.

I Ergonomic design and operator-friendly structure suitable for long, repetitive, and fatigue-free operation.

I Protection degree: IP67,69K
I Supports CAN communication, analog output, and USB output, and can be used with a controller for various IoT purposes.

*) Above information applies to TS series

| Series | Supply Voltage Range | Consumption Current | Operating Force | Durability | Weight |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TS | $5.00 \mathrm{~V} \pm 0.01 \mathrm{~V}$ DC | 11 mA max. | $3.1 \mathrm{~N} \pm 0.5 \mathrm{~N}$ (*1) | 1,000,000 times | $18.25 \mathrm{~g} \pm 5.0 \mathrm{~g}$ |
| NV |  | 50mA max. | Directions: $4 \mathrm{~N} \pm 1 \mathrm{~N}$ <br> Pushbutton: $11 \mathrm{~N} \pm 2 \mathrm{~N}$ | 1,000,000 times |  |

${ }^{\star}$ ) Force applied to the top of the castle cap.

Application: Indicating direction and adjusting positioning with teaching pendants and remote controllers

Non-contact thumb controllers for durability and downsizing

## $\mathrm{N}^{2 \prime}$ D D series OAPEM

Hand-Held Pendants

Ergonomic game style pendant controller

IUSB and analog output options.
I Lightweight, one hand operation.
I Excellent proportional control for smooth vertical movement of lifts.
IConfi ured to order.

- Readily available in TS series thumbstick and IM series pushbutton configuration

| Series | Supply Voltage Range | Consumption Current | Operating Force | Life | Weight |
| :---: | :---: | :---: | :---: | :---: | :---: |
| PC | $5.00 \mathrm{~V} \pm 0.250 \mathrm{~V} \mathrm{DC}$ | 100 mA | $\begin{aligned} 3 \mathrm{~N} & \pm 0.5 \mathrm{~N}(\mathrm{TS}) ; \\ 6 \mathrm{~N} & \pm 2 \mathrm{~N}(\mathrm{IP}) \end{aligned}$ | 1 million operations | 226.8 g |

Application: For remote control of AGVs, Lifts, and AMRs

## $\overbrace{}^{1 / 2}$

## FC6A

PLC suitable for the loT era

I WEB server function allows easy construction of a remote monitoring system.

I Data can be sent by CSV file or screenshot using the email function allowing tracing of devices, factor analysis, and sending early alerts to operators.

I Remote maintenance can be performed by using the FTP server and client function to transfer project data and read historical data.

I Supports standard communication protocols for the industrial industry on CPU modules, communication modules, and communication cartridges. The communication monitoring function reduces debugging time and allows smooth communication with peripheral devices.

Operator Interfaces

Excellent visibility and usability equipped with basic performance required for operators

I With the WEB server function, location of AGVs and status of automated warehouses can be checked, and remote monitoring and operation of device is possible using a PC, tablet, or smartphone.

| Data inside operator interfaces can be sent by CSV file or screenshot using the email function allowing tracing of devices, factor analysis, and sending early alerts to operators.
| Remote maintenance is possible by using the FTP server and client function to transfer project data and read history data.
\| Maintenance time can be reduced with a long-life, high-performance LED backlight, reducing operation costs.
I Stress-free 1.5-second startup allows quick access to devices.

Application: Operation and monitoring of AGVs, AMRs, and automated warehouses

## We make the point of contact, where people interface with machines, easy, safe and secure. We create new possibilities.

One of our corporate principles is to conduct business with consideration for social contribution. Since its founding, IDEC has developed and introduced the world to numerous products and services centered on its control technology. Today, our products are used not only in factories, but in a wide range of settings in people's everyday lives where customers desire safety, ease of use, reliability and a smaller environmental footprint.
