From its beginning, the IDEC Group has provided products and services to society by integrating with control and safety technology in products vital to society. Contributions to the resolution of societal challenges through our business activities include, in particular, (1) promotion of automation, labor-saving, and higher efficiency; (2) realization of safety and ANSHIN; and (3) reduction of environmental impact in manufacturing sites as well as people’s lives around the world. We aim to create an optimum environment for humans and machines, as stated in our Mission, and to help build a sustainable society.

We identified five areas – Environment (E), Social (S), Governance (G) plus the IDEC Group’s two core elements of Safety (Sa) and Quality (Q) – as the CSR focus areas, established the CSR Committee in April 2018, and we are making continuous efforts in our CSR activities.

Through our business activities, we contribute to the 17 Sustainable Development Goals (SDGs) and the associated 169 targets, set by the United Nations and intended to be achieved by the year 2030.
